

Little Sermons On Saving—No. 14

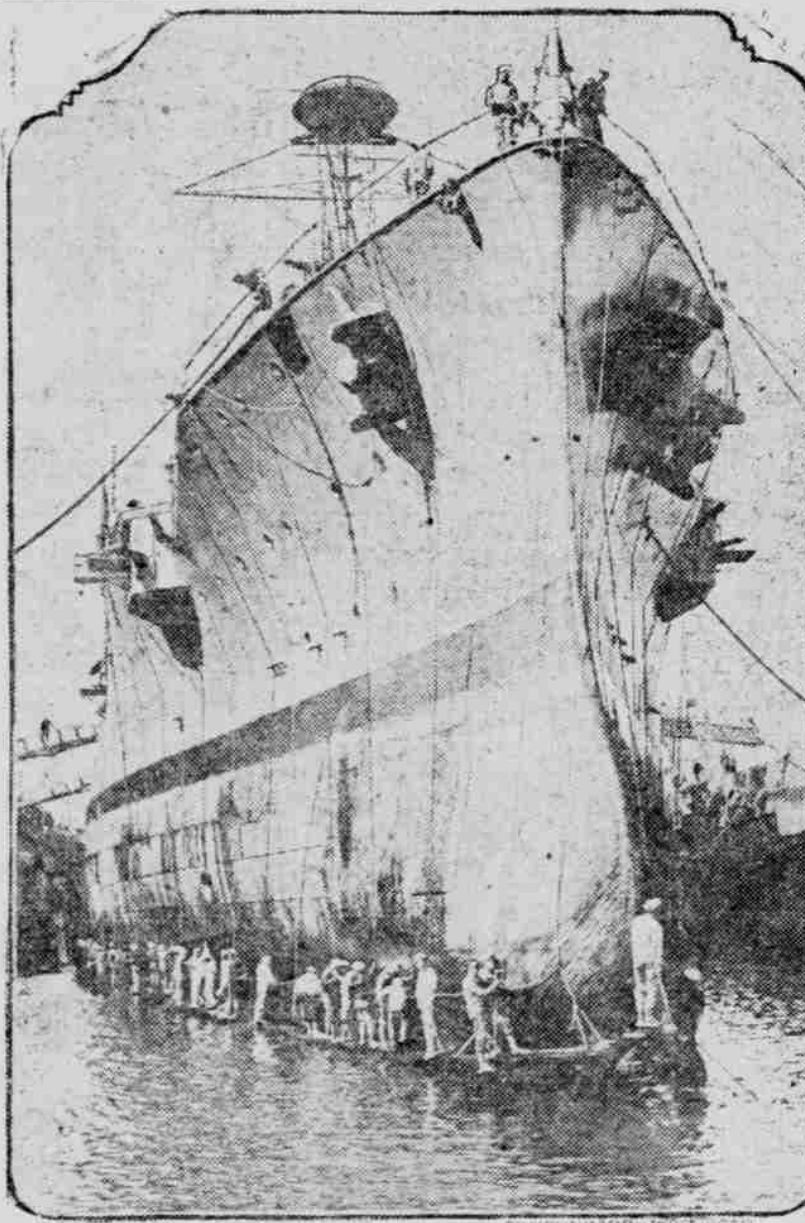

The Best Investment

Of all forms of investment for the savings of persons of moderate income, there is nothing in the end so satisfactory as a savings account. If undisturbed, it steadily increases through accretions of interest, and is always available in time of need. It often happens when money is needed that an investment cannot be immediately realized upon without a material shrinkage in value. The investment of money calls for a certain familiarity with values and conditions which can only be obtained by long and intelligent study. Tempted by the expectation of increased income, persons too often put their savings into investments of which they can know little and which in the end prove grievous disappointments.

"PHOENIX" ONLY SAVINGS BANK

OVERHAULING BIG U. S. BATTLESHIP

This remarkable photograph of the American battleship Florida was taken in the New York navy yard on her return from the recent maneuvers when she was defeated by the "enemy." Photo shows the sailors cleaning the bottom and sides of the ship preparatory to another assault on the "enemy" at the maneuvers next month.

Budlong, president of the company's branches, declaring that an error had been made in pricing the cars. Budlong is positive that every car allotted to New York City could be sold for \$500 more than the list price.

In nearly every important center of distribution, Packard dealers are making insistent demands for increased allotment.

PRESUMPTIVE EVIDENCE

"But are you sure the telegram is really from your son, Mrs. Robb?" asked the visitor.

"No—not sure," said Mrs. Robb, "but it looks like Tom's handwriting."

FAMOUS PATHOLOGIST TO BE VISITOR HERE

Phoenix is to be honored shortly by a visit from Prof. Leo Loeb, president of the American Pathological society, and world famous as a research worker in the field of experimental medicine and bacteriology.

Prof. Loeb will arrive from his home in St. Louis to spend a brief vacation with Dr. W. O. Sweek of 1430 North Third street.

Summering Arizonians

Johnny Northcutt and family and Miss Eva Northcutt of Springfield, Ill., will leave June 15th for a long auto tour lasting three months. Mr. Northcutt has his new car—a Studebaker Six—in good condition for the trip, and will take the Southern route to San Diego first, where they will visit the exposition and all other points of interest thereabouts. They will continue up the coast to Los Angeles and other seaports. "Betty" will then land Mr. Northcutt and his family in San Francisco where they will indeed enjoy themselves, with the exposition as the grand final attraction.

Walter Talbot is leaving soon for Iron Springs.

Mr. and Mrs. J. R. Blakely, well known Salt River valley people, have left Corona, Cal., and are now located in El Monte. Mr. Blakely writes we like California fine—but Arizona is hard to beat.

Mrs. Ayre-Shaft—The people in the next apartment are having a lovely time deciding on names for their new twins.

Mr. Ayre-Shaft—Tell them I suggested Hugh and Cry-Judge.

"A designing man I hate," she said, "With scornful head erect; And yet within a year she loved And wed an architect."

FINANCES AND MARKETS

[ASSOCIATED PRESS DISPATCH]

NEW YORK, June 12.—Dealings in stocks would have been more impressive had the movement shown greater breadth. Most standard shares were neglected, activity and interest advanced again converging about war specialties and other stocks more or less remotely within that specific class. For instance, Federal Mining and Smelting, common and preferred, one of the obscure issues in the Guggenheim group, scored temporary gains of 20 and 5 points, respectively, partly as a result of higher prices for refined copper and lead. American Smelting, Guggenheim exploration and Amalgamated copper rose 1 to 2 points. In the more distant war issues, Bethlehem Steel, preferred, rose to the new high price of 199.

Bonds were steady, total sales aggregating a par value of \$1,385,000. United States bonds were unchanged on call during the week.

Metals

Electrolytic, \$20.25; silver, 49%; copper, firm.

to 410,000 shares. In their bearing upon industrial conditions, a new high export quotation of 20½ cents for copper of best grade, and local raise in lead to 7 cents were the chief features of the session. More gold was received from Canada, making the return flow of metal from all sources since January approximately \$100,000,000. Actual bank loans expanded almost \$16,000,000 during the week, with a cash gain close to \$16,500,000, and reserves increasing about \$8,500,000.	Arizona Commercial	8½	8½

PACKARD "12" CAUSES SENSATION IN GOTHAM

The newest motor car design in the world made its metropolitan appearance at the Packard store in New York last week. By six o'clock in the evening 4925 persons had called to

make an inspection of the "Twin Six" and this number was increased by several hundred during the hours previous to the opening of the theaters.

The day following the 5000 mark was again passed, establishing what is probably a record for Broadway's motor row. Testifying to the fact that this enormous number of callers was not made up of the idly curious is a wire sent to the factory by M. J.

SPRING FOOTWEAR
